

Building the future of reading education through open collaboration and transparent development.

Our Vision

Global Accessibility

Making evidence-based reading instruction accessible to educators worldwide through open source technology and collaborative development.

Scientific Rigor

Ensuring all content and methodologies are grounded in the latest research from cognitive science and reading education.

Current Status

Phase 1: Foundation

Core app development and content creation

Initial development of the Science of Reading app with comprehensive content covering phonics, comprehension strategies, and evidence-based teaching methods.

Phase 2: Community Building

In Progress: Open source infrastructure and documentation

Establishing the open source framework, documentation standards, and community guidelines for collaborative development.

Phase 3: Open Collaboration

Planned: Full open source release

Complete transition to open source with community-driven development, contributions from educators worldwide, and transparent development processes.

Development Roadmap

Q1 2024

- Complete content migration to open source format
- Establish GitHub repository structure
- Create contribution guidelines
- Develop API documentation

Q2 2024

- Launch beta open source version
- Community feedback integration
- Translation framework development
- Mobile app open source release

Q3 2024

- Full open source launch
- Community-driven feature development
- International localization
- Advanced analytics and reporting

Q4 2024

- AI-powered content recommendations
- Advanced assessment tools
- School district integration
- Research collaboration platform

How to Contribute

Content Creation

Help create and improve educational content, lesson plans, and teaching resources.

[Get Started](#)

Code Development

Contribute to the app's codebase, fix bugs, and add new features.

[View Code](#)

Translation

Help translate content into different languages to reach more educators worldwide.

[Translate](#)

Testing & Feedback

Test new features, report bugs, and provide feedback to improve the user experience.

[Report Issues](#)

Technology Stack

Frontend

Vue.js 3
Bootstrap 5
Vite
PWA Support

Backend

Node.js
Express.js
MongoDB
RESTful APIs

Mobile

React Native
Expo
Offline Support
Push Notifications

Infrastructure

GitHub Actions
Docker
AWS/Vercel
CDN

Community Guidelines

Respectful Collaboration

We foster an inclusive environment where all contributors feel welcome and valued. Respect diverse perspectives and experiences.

Evidence-Based Approach

All content and features should be grounded in scientific research and evidence-based practices in reading education.

Educational Focus

Our primary goal is to improve reading outcomes for all students. Every contribution should serve this educational mission.

Global Accessibility

We strive to make our tools accessible to educators worldwide, considering diverse cultural and linguistic contexts.

Ready to Join the Movement?

Help us build the future of reading education. Every contribution, no matter how small, makes a difference.
